

IMPACT Day Countdown

Prologis Solihull's IMACT Day 2019 will be spent helping out the children at Crick Primary School in Northampton, UK by making improvements to the school's outdoor space.

Since the school is near the largest site DFRFT (Davenport International Rail Freight Terminal in Northamptonshire), it made sense to approach the school that is in the same community and ask if they needed any help. Helping out a fellow community member is indeed important and also helps to foster positive relationships within the community.

Much will be done to improve the outdoor space of the school. For instance, Prologis employees will be building an outside classroom with a slab base; installing a slab path; restoring existing painting on the outside of the school and weatherproofing it; revamping a planting area; moving an existing picket fence and adding a new one; planting and barking; installing a new gate and fence and seating area—these are all apart of the projects for the school.

These improvements will greatly benefit the school and its students. It will make a much better outdoor area that will improve learning, interaction, and play.
